REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1-10 are directed to an image projection apparatus. Each independent claims 1 and 9 identifies the uniquely distinct features: "means for guiding the light having passed through the sequential color selecting means and said white light to said spatial light modulator; and means for adjusting the temporal average intensity of the white light; wherein said spatial light modulator spatially modulates the light having passed through the sequential color selecting means and the white light with its temporal average intensity having adjusted, to generate image light". All the references of record, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

Claims 11-28 are directed to an image projection apparatus. The independent claim 11 identifies the uniquely distinct features: "a light intensity adjuster configured to dynamically adjust an intensity of the reflected light as an intensity adjusted light; and a spatial light modulator configured to spatially modulate the passed-thru light and the intensity adjusted light to generate an image light". All the references of record, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

Claims 29-39 allowable for the same reason as discussed in the last Office Action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
